

Tax Free Weekend Process

Follow this process for Tax Free Weekend POS ringing in Sitoo.

This process is only for the permitted timeframe specified by the state.

- Returns with receipt brought back from tax free weekend should apply correctly at the POS. If you have a return from tax free weekend where the tax applies back onto the transaction, follow these steps to remove the tax from the return.

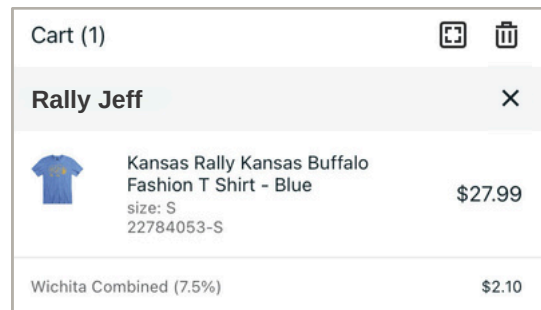

Endless Aisles transactions qualify for tax free **if the shipping address is in the state where there is tax free.**

- If the shipping address is an out of state address, ring Endless Aisles and in-store purchases on separate transactions.

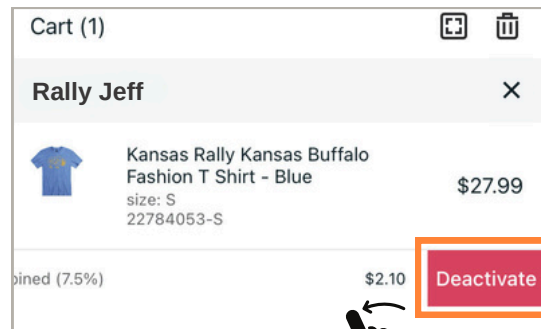

1 Scan items into cart on point of sale following the normal process.

- Ask the guest "What is a good email for you today?" at the beginning of the transaction.

2 Once all items are scanned, **swipe left** on the tax line item to remove tax.

- Tap Deactivate.

3 This will **strike through** the tax line item to visibly show that the tax has been removed.

4 Accept payment and **complete** transaction.
