Handheld Browser Setup Guide

THE IMPACT: Completing browser setup prepares your handheld device to open label files when printing from PORT. Follow this guide to complete the Browser app setup, then return to the PORT app to receive shipments and print labels.

THE GAME PLAN:

SET BROWSER AS DEFAULT

1. Open the **Browser** app.
2. Follow the setup screens, selecting **Continue, More, or Next** as prompted.
3. On the final screen, select **Start.**
4. Confirm that the Samsung browser screen opens. (If a PORT login screen opens, exit that screen. You will access PORT through the PORT app).
